---

## WORK EXPERIENCE

---

### InterContinental Hotels Group

May 2019 – Aug 2019

IT Asset Management Intern

Atlanta, GA

- Collected and analyzed hundreds of corporate technological assets worldwide on the ServiceNow database
- Contacted all employees on the database to confirm each employee's data was correctly updated and delivered all database updates to management for review
- Implemented more efficient methods of collecting and organizing asset data using Microsoft Excel, which reduced over 90% of errors within the database, including duplicates and false data

## PROJECTS

---

### Face Recognition App | [GitHub](#), [Live](#)

- Developed a React application that can detect a face inside any image that the user submits
- Using the Clarifai API's Face Detection Model, the app will draw a box around the detected face
- Created with React and the Clarifai API

### JS Calendar | [GitHub](#), [Live](#)

- Developed a calendar application that allows users to add event reminders
- Events are stored as objects and saved through JavaScript local storage
- Created with HTML, CSS, and JavaScript

### Album List | [GitHub](#), [Live](#)

- Developed an album lister app where users can submit an album through a form and gets added to their album library as an object
- Checks for duplicate values among albums by verifying each album has its own unique identification number
- Created with HTML, Bootstrap, and JavaScript

## EDUCATION

---

### The University of Georgia

May 2020

B.S. Computer Science

Athens, GA

## LEADERSHIP & CAMPUS INVOLVEMENT

---

### Lambda Phi Epsilon, Inc.

Aug 2019 – May 2020

Webmaster

Athens, GA

- Managed and organized the fraternity's WordPress website and updated it as needed with new member info, events, and pictures
- Replaced the website's outdated image gallery with a more modern gallery and updated pictures
